

# Information – Caravan parking area

## Thayatal National Park

The Thayatal National Park has the following services available:

### Water supply

A central potable water supply column is available.  
€ 1 provides approximately 100 l of water and lasts about 8 min.  
Please follow the instruction on the water column.

### Electrical supply

An electrical power supply column with 8 outlets (3-pin plugs) is available at the parking area. (Output current per socket: 230V AC).  
Power is available for €1 per 4 hours.  
Multiple €1 coins can be inserted to prolong the period of use.  
Please follow the instruction on the power supply column.

### Waste water disposal

Waste disposal is free. Waste water and sewage may only be disposed of in the designated waste water column or directly in the waste water channel opening. Use the waste water hose on the waste water disposal column to flush the caravan tank and any contaminated areas around the disposal column.  
Please only use sanitising liquid with the “Blue Angel” seal or a similar environmentally friendly seal.  
Follow the instructions on the waste water column.

Please note that the charges for the supply columns may only be paid using €1 coins. No change is possible.

For malfunctions, please inform the:
