

## **Mission of the National Park Thayatal**

The National Park Thayatal overcomes borders: it protects the unique valley landscape that unites Austria to the Czech Republic. It promotes the dynamic development of our regional habitat rich in fauna and flora and helps to experience nature.

### **We look ahead**

We are committed to people and nature. As a dynamic, flexible and innovative service provider of the Government and the Region of Lower Austria, we look to the future.

### **We set the trend**

We initiate political nature protection processes and also cross borders if needed: our efforts are for the nature in our region, in Austria and in the whole of Europe.

### **We set ourselves big objectives**

The smallest National Park of the country in the smallest town in Austria plays it big: quality and professionalism are our duties.

### **We are confident**

We let nature free. This is why we set limits for people. We only pull out trees to allow for others to grow.

We help people experience nature – because only those who know and understand nature will respect it.

### **We build on partnerships**

We shape rather than administer. And as such we keep moving.

With our cooperation and partnerships, we set new impulses – for nature, for the people and for our region.
